# SAFETY KNIFE

**The THORMASAFE ABR-SK2 Safety Knife is specially designed to cut through a wide range of materials in a safe manner. The blade extends to 25 mm for even the thickest carton. The ABR-SK2 is fitted with a replaceable SK-2 double sided blade that has a thickness of 0.6 mm. It features an automatic blade retraction mechanism that makes it safe to use in a variety of surroundings.**

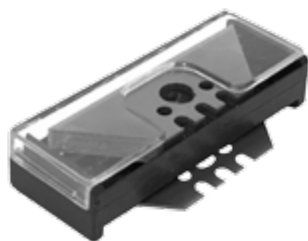

## APPLICATIONS

Cuts through:

- Cardboard
- Wrapping and shrink foil
- Plastic strapping bands
- Tape
- Bagged goods
- Yarn
- PVC
- Fleece
- Felt
- Textile
- Layers of paper and foil

## REPLACEMENT BLADES

Replacement blades forged out of SK2 steel available as a 10 unit pack sold separately.

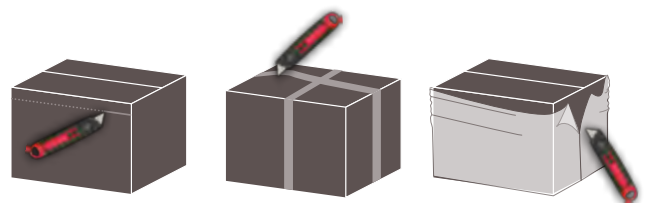

## INDUSTRIES

logistics

fulfilment

## PRACTICAL SAFETY

Once the ABR-SK2 is removed from the cutting surface and you let go of the slider, the blade will automatically disappear into the handle for safer daily usage.
